ProEM-1[®] Dietary Supplement

ProEM•1[®] Dietary Supplement is the first probiotic health product on the market to contain phototropic bacteria, a group of beneficial microorganisms known to break down toxic substances and promote the healthy restoration of intestinal microflora. Probiotics (meaning "for life") are the reverse of antibiotics. Instead of indiscriminately destroying all bacteria, the all-natural ingredients of ProEM•1[®] work synergistically together to secrete beneficial byproducts such as vitamins, hormones, enzymes, organic acids, bioactive minerals, and a broad variety of antioxidants that help to build a healthy immune system.

- Breaks down toxic substances and produces beneficial antioxidant byproducts including: *inositol, ubiquinone, saponin, low-molecular polysaccharides, polyphenols, and chelates of minerals.*
- Contains all-natural and organic ingredients.
- No synthetically engineered ingredients or preservatives.
- A naturally-occurring, soil-based microbial formula.
- Live microbes, not freeze-dried, for increased viability.

ProEM•1[®] Probiotic contains a minimum of one million colony-forming units per ml of the following microorganisms:

- *Lactobacillus plantarum*
- *Lactobacillus casei*
- *Lactobacillus bulgaricus*
- *Saccharomyces cerevisiae*
- *Rhodopsuedomonas palustris*

Suggested Dosage. Use as a dietary supplement to promote the restoration of beneficial intestinal microflora that helps to build a healthy immune system.

- For the first-time user, start at a low dosage of one teaspoon per day.
- Over a period of one to two weeks, gradually increase to the recommended dosage to three teaspoons per day.
- Can be taken with or without meals. For palatability, mix with water or juice.
- For individuals with dietary disorders such as candida or ulcers, it is best to start with one or two drops per day and gradually work your way up to the recommended dosage.
- Although extremely rare, ProEM•1[®] may disagree with some individuals. Discontinue use, if discomforting symptoms develop and persist after consuming.
- ProEM•1[®] does not need to be refrigerated. Store out of direct sunlight in a dry place.

Suggested Uses. ProEM•1[®] Probiotic is a naturally fermented liquid product that has not been pasteurized. Always consult a physician, when in doubt about the benefits of using ProEM•1[®] Probiotic.

- Naturally detoxifies and cleanses the intestinal digestive tract to build immune-enhancing properties.
- Restores the healthy balance of beneficial intestinal microflora that helps to build natural defense alliances.
- Increases vitamin absorption and the bio-availability of nutrients.
- Supplementation for enzymes and amino acids.
- Improved regularity and relief from constipation.
- Replenishes healthy microflora after taking antibiotics.
- One 260ml bottle provides an 18-day supply at the recommended dosage.

Beneficial Ingredients

ProEM•1[®] Probiotic is a naturally fermented dietary supplement with the primary ingredients of: *purified water, organic aloe vera gel, natural honey, organic blackstrap molasses, lactic acid bacteria, brewer's yeast, and phototropic bacteria.*

Organic Aloe Vera Gel contains germanium, a known antioxidant that stimulates the immune system, increases transportation of oxygen into cells, and aids in cell and gene repair.

Natural Honey provides essential nutrients and vitamins, and is a good source of minerals – iron, sodium, phosphorus, and calcium. Honey aids in digestion and is a known source of antioxidants. Honey also provides a natural allergy defense.

Organic Blackstrap Molasses is a natural sweetener that provides a significant source of potassium, calcium, and iron that promote good health.

Lactic Acid Bacteria are known to reduce harmful bacteria in the digestive tract and help to improve digestion. Some studies have demonstrated their ability to stop the growth of *H-pylori*, the bacteria connected to causing stomach ulcer and stomach cancer.

Saccharomyces Cerevisiae, known as brewer's yeast, is a source of B-complex vitamins and protein and a great source of chromium. This type of yeast is not related to those yeasts known to be a source of infection.

Rhodopsuedomonas Palustris is the unique ingredient found in ProEM•1[®] that is the toxin-consuming phototropic strain of bacteria and is a known source of the Carotene Vitamin A, an important antioxidant that is beneficial for healthy skin, bones, and night vision.
